Message from the Chair of the International Scientific Committee (ISC)

Gabriel Eckstein
Texas A&M University

“Water for life; water for everybody;
water security; water for the environment”

These are some of the cries we often hear worldwide from indigenous communities, businesses, non-governmental groups, and industry sectors, each one vying for increasingly limited water resources and, thereby, challenging existing water management regimes. If loud enough, these cries can serve as a foundation for new policies and decision-making and can catalyze governments to adopt new approaches and novel strategies for water resources management.

All-too-often, such cries and decisions lack a strong scientific underpinning supporting the soundness of the new approach or strategy. Sometimes they work, but oftentimes they result in unforeseen and unintended consequences. The reality is that a disconnect exists between the scientific and policy-making communities, and even between the scientific community and civil society. These are gaps in knowledge and communications between those with the technical knowledge, and those with the drive and capacity to make changes.

In selecting the overall theme as “Bridging Science and Policy”, the XVIth World Water Congress aims to bridge these gaps and facilitate both dialogue and collaboration among the various water communities and stakeholders. The chief objective of the Congress is to link water professionals across the various disciplines with information and experiences related to water resources issues around the world, as well as with experts – in both the public and private sector – working on key global water agendas and strategies.

As a platform for dialogue and exchange, the XVIth World Water Congress offers a unique space for advancing all of these objectives. Moreover, it will facilitate opportunities for coordinating research efforts with policy objectives. By collaborating and combining all of our efforts, by bridging and fortifying relations among scientists and policymakers, we will ensure a more sound future for the world we leave to our children.

Accordingly, on behalf of the Bureau and International Scientific Committee of the XVIth World Water Congress, I warmly welcome you to take part in the multitude of regular, special, and extraordinary sessions, high level panels, receptions, and networking opportunities that have been planned throughout the week of the Congress. We especially encourage your active participation in the ongoing discussions and to raise your ideas and suggestions as we collectively pursue solutions for some of the world’s most vexing water-related challenges.

I look forward to seeing you in Cancun, Mexico!

Message from the Congress Steering Committee (CSC)

Roberto Olivares
ANEAS of Mexico, A.C.

The International Water Resources Association (IWRA) is one of the pioneer organizations in the global discussion on the world's water situation and challenges. IWRA, through its World Water Congress, has also been a pioneer in bringing together the international community to discuss the most pressing issues in the water sector.

In 1979, Mexico had the honor to host this Congress third edition, and now, thirty-eight years later, the Mexican Government, through the National Water Commission (CONAGUA), will welcome again experts, scientists and researchers, politicians, decision-makers, utilities, technological innovators, investors, legal specialists, regulators, students and groups involved in capacity building to gather and share experiences during the XVI World Water Congress.

For Mexico, holding the XVI Congress reaffirms its global responsibility to drive a green agenda, where water policy is of utmost importance and a priority commitment. This is consistent with the task assumed to co-chair the High-Level Panel on Water, created by the United Nations and various international organizations.

In that vein, on behalf of the Congress Steering Committee members, we are delighted to welcome all participants, convinced that the outcomes of the meeting will be fruitful and an important step to continue building a genuine pact towards global water security.

The IWRA and the World Water Congresses

*Resolution to create the World Water Council (host of the World Water Forum) was made at the 1994 Congress

Objectives of the Congress

- Global meeting place for water stakeholders & professionals
- Share experiences, promote discussion, & present new knowledge, research results and developments
- Identify major global themes concerning the water agenda
- Pursue and encourage development and implementation of policy decisions

XVI World Water Congress

KOHUNLICH, Quintana Roo

The XVI World Water Congress under the overarching theme “Bridging Science and Policy”, is organized by the International Water Resources Association (IWRA), the National Water Commission of Mexico (CONAGUA) and the National Association of Water and Sanitation Utilities (ANEAS) will take place in the global water agenda at a decisive time, in face of the early stages of the 2030 Agenda and its implementation. The Congress takes into account the outcomes of the 7th World Water Forum held in Korea in 2015 and is a milestone towards the 8th World Water Forum to be held in Brasilia in 2018, focusing on the adoption by the UN General Assembly of the Sustainable Development Goals (SDG’s) and the COP 21 climate agreement.

At this juncture, the World Water Congress aims to provide a meeting place to share experiences, promote discussion, and present new knowledge, research results and new developments in the field of water policy and science from around the world. For more than four decades, World Water Congress have been the breeding ground for identification of major global themes concerning the water agenda as well as for bringing together a large cross-section of stakeholders for the development and implementation of decisions in the field of water.

Natural and social scientists, engineers, technological innovators, policy and decision makers, financial stakeholders and investors, legal and regulatory specialists, students and groups involved in capacity building will discuss and present their initiatives. The Congress will bring together science and policy as well as possible solutions and pathways for the sustainable governance and management of the water, through best practices and recommendations for global, regional and local policies. It will help to connect scientific knowledge and policy actions, between those making scientific and technological discoveries and those who can mobilize governmental and societal adoption and implementation.

A Few Distinguished Speakers

Ramon Aguirre	President	ANEAS
Aziza Akhmouch	Head of Unit - SDGs, Water and Local Public Services	OECD
Catarina de Albuquerque	Executive Chair	Sanitation and Water for All
Doğan Altınbilek	Vice-President	World Water Council
Luis Arce	Finance Minister	Bolivia
Asma Bachikh	President	World Youth Parliament for Water
Eugenio Barrios	Director of Public Policy, Corporate & Social Engagement	WWF Mexico
Diane d'Arras	President	International Water Association
Jean-Didier Berthault	Vice-President	Paris Sanitation Corporation
Benedito Braga	President	World Water Council
Stephano Burchi	Executive Chairman	International Association for Water Law
Jose Carrera	Vice-President	Development Bank of Latin America
Torkil Jønch Clausen	Chair of the Thematic Commission	8th World Water Forum
Gabriel Eckstein	Chair	International Scientific Committee, World Water Congress
Jerome Delli-Priscolli	Chair	GWP Technical Committee
Jean-François Donzier	Executive Secretary	International Network of Basin Organisations
Amadou Mansour Faye	Minister for Water Resources and Sanitation	Senegal
Torgny Holmgren	Executive Director	Stockholm International Water Institute
Neil Grigg	Professor	Colorado State University
Blanca Jimenez-Cisneros	Director, Water Division	UNESCO
Karin Krchnak	Director of the Freshwater Program	World Wildlife Fund USA
Simon Langan	Director of the Water Program	Institute for Applied Systems Analysis
Patrick Lavarde	President	IWRA
Haksoo Lee	CEO/President	K-Water/Asia Water Council
Soontak Lee	President	International Hydrologic Environmental Society
Yuanyuan Li	General Director	Institute of Water Resources & Hydropower Planning, China
Guihua Lu	Vice-minister for Water Resources	People's Republic of China
Rabi Mohtar	TEES Research Endowed Professor	Texas A&M University
Saeed Nairizi	President	International Commission on Irrigation and Drainage
Roberto Olivares	General Director	ANEAS
Federico Properzi	UN Water	UN
Roberto Ramirez de la Parra	General Director	CONAGUA
Alfonso Rivera	Chief Hydrogeologist	Geological Survey of Canada
Diego J. Rodriguez	Senior Water Resources Management Specialist	The World Bank
Paulo Salles	Co-President	8th World Water Forum
William Sarni	Advisor on Water Strategy & Technology Innovation	Water Foundry
Mark Smith	Director of the Global Water Program	International Union for Conservation of Nature
András Szöllősi-Nagy	Chair	International Hydrological Programme, UNESCO
Cecilia Tortajada	Senior Research Fellow, Institute of Water Policy	Lee Kuan Yew School of Public Policy, Singapore
Jun Xia	Academician	Chinese Academy of Sciences
Victor Hugo Alcocer Yamanaka	Deputy Director for Technical Issues	CONAGUA

General Program

The Congress will count with more than 13 Parallel Sessions, including approximately 55 Special Sessions, more than 250 presentations and 100 posters to be exhibited

Monday 29	Tuesday 30	Wednesday 31	Thursday 01	Friday 02	Saturday 03
Official Opening Ceremony	Parallel Sessions 3	Parallel Sessions 6	Parallel Sessions 10	Parallel Sessions 12	Field Trip
High Level Panel "Water and the SDGs"	High Level Panel "Water and Climate"	Parallel Sessions 7	Parallel Sessions 11	Parallel Sessions 13	
Parallel Sessions 1	High Level Panel "Water and Business"	High Level Panel "IWRM"	High Level Panel "Water-Energy-Food Nexus"	Closing Ceremony	
Parallel Sessions 2	Parallel Sessions 4	Parallel Sessions 8	IWRA Awards	IWRA General Assembly	
Congress Welcome Reception	Parallel Sessions 5	Parallel Sessions 9	Congress Gala Dinner		

Registration

The International Water Resources Association (IWRA), the National Water Commission (CONAGUA) and the National Association of Water and Sanitation Companies (ANEAS), invite you from May 29 to June 3 to participate in the XVI World Water Congress in Cancun, Mexico.

- The registration process is still open. There are the preferential rates for IWRA members.
- You can choose payment per day or for the whole week.
- Choose the option of your interest and confirm your registration to this mayor event.
- Online registration: <http://iwra2017.xporegistro.com/index.php>

Benefits

The inscription fee includes the following:

- Right to the Sessions of the General Technical Program, Special Sessions and Parallel Events
- Welcome Kit with the Event Program
- Access to the Welcome Cocktail
- Gala dinner (limited availability)
- Field Trip (limited availability)

Coastal Area Cancun, Quintana Roo

Local Transportation

To get around Cancun, the city has an ample fleet of taxis to get you to different points of the city. Taxis in Cancun are safe, reliable and fast, although you have to take into account the different rates that can be applied between the urban area and the hotel zone.

The most accessible means of transport to move between the city center and the hotel zone is by one of the buses that travel along the Kukulcan Boulevard (tickets cost around 11 Mexican pesos). The buses that go from the hotel zone to the city center carry the sign "Downtown", while in those that go from the center to the hotels are designated "Hotels". Tickets can not be paid with debit or credit cards.

Accompanying Programme

May 31st, June 1st and 2nd, 2017

ARCHEOLOGIC ZONE OF TULUM

The only archaeological site that sits on the seashore, Tulum was a Mayan fortress. Half-day tour, one hour tour and free time on a lovely beach in Tulum where you can swim in the turquoise blue water or just soak up the sun.
